EDUCATION

University of Wisconsin-Madison, Madison, WI *Expected May 2026*
Master of Science—Computer Sciences (CGPA: 3.9/4.0)
Saint Mary's University of Minnesota, Winona, MN *May 2022*
Bachelor of Arts (CGPA: 3.9/4.0)
Majors: Computer Science, Business Intelligence & Data Analytics, Finance — Minor: Creativity & Inquiry
Magna Cum Laude — 8 Dean's Lists — Delta Mu Delta National Honor Society Inductee

SOFTWARE ENGINEERING EXPERIENCE

Open-Lambda, Madison, WI *Feb 2025 – Present*
Intern

- Develop and optimize serverless function execution and worker orchestration in Open-Lambda, integrating event-driven triggers like Kafka to enable real-time and batch processing.
- Enhance the scalability and efficiency of the Open-Lambda platform by improving worker auto-scaling, dynamic configuration updates, and secure multi-tenant execution environments.

rtNOW, Frankenmuth, MI *May 2022 – Aug 2024*
Full-Stack Software Developer

- Identified inefficiencies and developed scalable web-based software, reducing appointment process time by 40% and improving efficiency by 25%.
- Designed, implemented, and optimized RESTful APIs, increasing data retrieval speed by 30% and improving user interactions.
- Provided ongoing technical support, achieving a 95% client satisfaction rate and 15% faster project delivery.

SOFTWARE ENGINEERING PROJECTS IN PRODUCTION

Scheduler Web Application
Facilitates outpatient respiratory telehealth scheduling

- Developed a scheduling application used by 100+ users daily, maintaining a 99% uptime.
- Integrated real-time appointment tracking and automated reminders, decreasing missed appointments by 20% and improving staff coordination by 30%.

CoreLink Web Application
Allows users to sign up for shifts and take calls from inpatient hospitals

- Reduced call wait times by 50% and decreased server load by 80%, enhancing performance.
- Replaced polling mechanism with WebSocket-based system, improving real-time updates and reducing server requests by 75%.

OTHER PROJECTS

Shell

- Developed a Unix shell in C, incorporating command execution, input/output redirections, variable management, command history, and batch mode support.

File System

- Built a FUSE-based Unix file system in C with RAID 0/1 support, enabling file/directory operations, metadata management, and RAID-compliant structures.

SOFTWARE ENGINEERING SKILLS

Languages: C, C++, Python, PHP, JavaScript, SQL, MySQL, HTML, CSS, Go
Frameworks & Libraries: CodeIgniter 4, Vue, React, gRPC, Spark
Tools & Technologies: AWS, Git, GitHub, Bitbucket, Jira, Docker, Cassandra, HDFS, Kafka, BigQuery
